It's me **Ashish Bhandari** from *Jhapa,* Currently pursuing a **Bachelor of Information Management** at **Mechi Multiple Campus** (Tribhuvan University). I'm passionate about web development and continuously learning new technologies. In my free time, I enjoy reading and exploring different frameworks to enhance my programming skills.

Projects

Fast Courier (link) + DK Courier(link) *(Courier Booking Systems)*
Fast Courier is built with PHP, JavaScript, and MySQL, while **DK Courier** uses Django (Python), JavaScript, and MySQL. Both automate courier bookings with invoice and bill generation, and use QR codes or barcodes for efficient package detail access..

- **Fast Courier** is actively used by a courier company to manage day-to-day booking operations.
- **DK Courier** includes all features of Fast Courier with additional functionality such as a suggestion form for users. Suggestions are stored in a database and emailed to admins, who can respond via a built-in reply system.

SajiloYatra(link) *(Bus Management System)*
 Built using **Python (Django Framework)** as part of my academic project.

- Enables vehicle registration, scheduling, and route planning for bus companies.
- Includes a user panel where customers can view routes, book tickets, track their travel history, and access QR-coded tickets—helping users manage travel expenses efficiently.

Weather App(link)
 Developed using **HTML, CSS, and JavaScript**, integrating the **OpenWeather API**.

- Allows users to search and view real-time weather information for any location.
- Displays current weather and forecasts using dynamic API data.

Skills

Programming Languages: JavaScript, Java, PHP, Python
Frameworks: Laravel, Django
Tools: Git, GitHub

Education

Bachelors of Information Management (BIM) → 2022 → Present
